

Magnetel has patented solutions for unique passive magnetic bearings that enables- and improves high speed operation

Company Presentation

Vision

We will revolutionize the market for usage of high speed bearings and will become the leading and obvious supplier of bearing to high speed dependent applications.

Furthermore, we aim to introduce usage of high speed bearing into new consumer markets application that drives the industry towards environmentally friendly solutions.

Business Offering

- 1. Catalogue sales of standard size bearings at a cost per unit.*
- 2. Licensing of rights (OEM) to selected application developers*
- 3. Design and construction services to selected partners within each application areas for implementation of our solution into application techniques and products.*

Business Model

The business will generate revenue based on unit sales, royalty per licensed unit and from specialist advisory, design and construction agreements.

Looking for in Partners

1. *Application developers*
 - I. *Energy storage*
 - *Automotive*
 - *Power Plants*
 - *Domestic storage*
 - II. *Energy Quality*
 - III. *Micro turbines*
 - IV. *Turbo*
 - V. *Vacuum pumps*
2. *Distributors of bearing units*
3. *Agents for design contracts*
4. *Producers of components*
